Hi Sherry,

I'm sure you are welcome to call in if you would like. Your comments are the same as the ones that I have and Kristen has, so we will be asking about those issues. I will forward John's call in number info if I see you were not on the recipient list.

Thanks for sending the comments.

Subject: RE: Tower Standard Service Proposed Work Plan

Bob,

I reviewed the proposed work plan. I have a few comments:

- 1) I think the workplan could be improved by adding some text describing REI's rationale for selecting the locations for soil borings that they selected.
- 2) It appears to me that rather than focusing on borings on Tower Standard that the workplan is focusing on confirming or eliminating other sources (15 samples on or around the NE intersection of Highway D and Highway 70 plus the 5 sample locations around the small pond.) Do we need to establish or eliminate off site contributions here or not? I would have liked to have seen other LUST or UST sites that are nearby more clearly marked on the figure.
- 3) I wonder if the boring advancement depth selected (12 feet) was selected because the depth to groundwater is 9feet below ground surface.
- 4) I think the figures should be expanded to show the locations of the borings on the Tower Standard site relative to the pump islands, former USTs and other potential sources on the Tower Standard property. It is hard to see where they are located relative to these important historical features.

If you think it would be helpful for me to attend the call that you have with John and Kristen, please let me know. Let me know if you have any questions about my comments.

Sherry

Subject: Tower Standard Service Proposed Work Plan

Bob and Kristen

Attached is the proposed scope of work the Department received from REI associated with the investigation at the Tower Standard Service Site (BRRTS #03-64-127889) in Lac Du Flambeau. Please note that the Department has not approved the work plan which calls for initial round of soil boring to be followed by the installation of additional monitoring wells. We have a number of concerns over the proposed scope and would appreciate your taking a look at it and providing us with any comments or questions by July 17th. It would be helpful to receive a coordinated response from EPA and the Lac Du Flambeau Band. Please let me know if that time frame works for you or if you have any questions.

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
